

FREIXANET LAUNCHES THE DUO MODULE, THE PERFECT COMBINATION OF SAUNA AND STEAM BATH

Freixanet presents the DUO module, an innovative product that offers unique possibilities in wellness areas for your home.

DUO is an exclusive FREIXANET device combining the pleasure of the sauna with the benefits of the steam bath. Given the properties and functions of these two alternatives, which bring about different beneficial stimuli in a wellness area, they complement each other perfectly. DUO is the result of fusing these two options in a single product with a customizable design, making it one of the most modern and innovative domestic wellness products in the market.

On one hand, the sauna, beautifully crafted in Scandinavian fir or in hemlock, presents numerous exclusive features, such as a wide glass panel in the front, comfortable benches with backs and stylish lighting. With the benefit of such details as headrests designed for maximum comfort, a high-output stove, etc. the sauna bath turns out to be an especially pleasant experience.

On the other hand, next to it, the steam bath, inducing the agreeable sensation of being surrounded by the magic of the fog, is lined with ceramic sandstone, mosaics or natural stone. There is also the option of an innovative lighting from the roof that will enhance the impression of relaxation. The steam bath includes a practical and comfortable control panel.

Summing up, on account of its overall practicality and elegance, the DUO module is a truly effective option, as it adds to the appeal of a domestic wellness area by its aesthetic value (many variants available to suit the user's taste), the saving afforded (as it combines two devices), and the pleasurable sensations (bringing together the benefits derived from heat and steam).

In this instance, Freixanet Saunasport offers a large number of possibilities in materials and ancillary components as well as exclusive designs at its clients' disposal, all intended for turning the wellness space that the client has imagined into reality.
