

# TERMARIA CASA DEL AGUA

At the moment, it constitutes one of the largest leisure aquatic centres in Europe

Freixanet Saunasport is going to contribute its most innovating products for commercial wellness spaces to “Termaria Casa del Agua”, one of the greatest centres of aquatic leisure in Europe and one of the most important infrastructures in the cultural, game and commercial fields in Galicia.

Freixanet Saunasport is going to take part in this attractive project, also considered the “Best Talasotherapy Centre in Spain”, installing professional saunas, its star project, for commercial wellness spaces, its star product, inside and outside the building. Both types of saunas have been designed by Freixanet Saunasport’s R&D&I Department, exclusively for Termaria.

Freixanet professional saunas have been created for intensive use, which is required by any installation with continuous affluence of visitors. Among its characteristics, some of them, such as great adaptability, long durability, maximum quality and easy maintenance stand out. In addition, they are functional and spacious saunas, with a modern design, which integrate an attractive and comfortable space so that clients may relax through the heat bath which the sauna provides; thus, they may enjoy a unique atmosphere and the most pleasant wellness sensations.

Outdoor professional sauna, which is going to be placed in the Rontenburo terrace, has got an innovating design which combines perfectly with the surroundings. The originality of this sauna lies on its location and its glazed front part, as well as the hemlock interior and the pre-sauna area, all of which integrate a space that undoubtedly invites to well-being and relaxation.

This type of outdoor sauna offers maximum resistance to weather inclemencies thanks to the quality of its finished materials. In addition, it displays various designs, adaptable to availability of space, great comfort in its, large independent banches which can be retired at any moment to facilitate the cleansing of the cabin, as well as comfortable backs.

Thus, with the new professional Freixanet saunas, Termaria Casa del Agua centre is going to have specially created equipment to give answer to its requirements and to the large affluence of visitors. Their users are going to enjoy a relaxing sauna bath comfortably, both outside and inside the building. Once more, the high technical expertise of the firm and its leadership in the market, for all types of facilities, are demonstrated.

## **About Termaria Casa del Agua**

Termaria Casa del Agua is divided into four clearly differentiated areas: Sport, Talaso, Club and Termaria’s Tratamientos® (treatments), all of which complement each other and, as a whole, constitute an integral offer in a unique installation.

This centre presents the singularity that, in just one space, it is possible to enjoy the first talasotherapy in Corunna, the greatest in Galicia and the first covered Olympic swimming pool in the city.

Termaria Casa del Agua responds to a strategy of strong brand, with a pioneer and global positioning in its field in our country. A vitalist, believable and close positioning, endorsed every day by a concept of total client satisfaction, which strengthen the personality and recognition of the brand.

Termaria is born from the Termoludic Spaces brand, a society which belongs to CXG NOVACAIXAGALICIA and which is in charge of the exploitation of the centre.
