

HOTEL PLATJA DAURADA

The Hotel Platja Daurada (four stars) is located in Can Picafort (Mallorca), in a very quiet zone and a unique environment for relaxation, in the centre of the Alcudia bay, in front of a kilometeric beach of dunes with low depth. The hotel already counted on a wide sport and services supply, and now this hotel establishment has decided to bet on a new experience for its clients, entering in the wellness world with the assessment of Freixanet Saunasport.

Our company has taken part of this attractive project, providing some of its more innovative products and treatment equipments. This equipments will undoubtedly represent the heart of this smart area. Just to mention some of them, the project includes some professional saunas of hemlock, with SUBLIMA under-benches heater; an innovative WELLPRO® steam bath with starry sky; and a leisure pool with leisure elements, such as water falls or massage bench with jets to enjoy a pleasant bubble bath.

Freixanet Saunasport will complete the wellness zone with different leisure showers, such as the bucket shower (cold water). And last but not least, cold water basins to supplement the wellness circuit.

This way the client of the Hotel Platja Daurada will be able to enjoy a new experience for body and soul, as well as all advantages of wellness. The final stage could be a nice sporting massage by a professional.
